WINTER SPRINGS ROOFING GUIDELINES

CODE: Florida Building, Existing Building and Residential Code

EDITION: 5th EDITION 2014 & effective December 31, 2017 the 6th EDITION 2017

ISSUE: To establish procedures for inspection of composite shingle re-roof work on One and Two Family Dwellings and Townhouses in Winter Springs.

PERMIT EXEMPTION THRESHOLD FOR RE-ROOF WORK:

Re-Roof work consisting of less than 100 square foot of work shall not require a permit. However, all work involving contracting between a homeowner and a third party shall be with a state licensed or registered contractor. This permitting threshold exemption does not and should not be construed to authorize unlicensed contracting.

INSPECTIONS:

The inspector may require an additional intermediate inspection between the In-Progress and the Roof Final inspection if sufficient work is not complete at the time of the Dry-In or In-Progress inspection. The inspector may require the removal of some underlayment in order to confirm deck nailing. AM request for Roof Final inspections cannot be accepted.

ROOF ACCESS:

A ladder must be provided by the contractor or owner/builder per Florida Building Code FBC 110.1 to allow the inspector access to the roof for each inspection. Failure to provide access to roof will result in a failed inspection and a re-inspection fee assessed.

INSPECTIONS FOR OWNER/BUILDERS CONDUCTING RE-ROOF WORK:

- 1) Roof Decking Inspection (100% sheathing completed with deck nailing per FBC-EB 708.7.1)*
- 2) Dry-in Inspection (100% installation of underlayment, flashing and drip edge)*
 - *The Roof Decking and the Dry-in inspection can be scheduled at the same time.
 - *Shingle installation up to 25% is recommended to allow inspection of shingle nailing and compensate for bad weather.
- 3) Roof Final Inspection (All work completed, dumpster removed, jobsite clean and clear of all tools)
If additional inspections are needed, these will be communicated to the owner/builder at the time of permit issuance by the Building Division.

INSPECTIONS FOR LICENSED CONTRACTORS:

- 1) In-Progress Inspection (100% sheathing completed with deck nailing per FBC-EB 708.7.1; 100% installation of underlayment, flashing and drip edge)
 - *Shingle installation up to 25% is recommended to allow inspection of shingle nailing and compensate for bad weather.
- 2) Roof Final Inspection (All work completed, dumpster removed, jobsite clean and clear of all tools)

AFFIDAVIT (LICENSED CONTRACTOR INSTALLATIONS):

The Building Division requires a DECK NAILING AFFIDAVIT to be completed by the license holder attesting to the code compliance of all or a specific portion of the work. The affidavit will need to be on the jobsite prior to the In-Progress inspection.

APPLICATION SUBMITTAL - Permit Forms Webpage

- 1) Application for Building Permit – Roof
- 2) Winter Springs Product Approval Form
- 3) Contractor Registration if new or update license and insurance
