Winter Springs completes installation of new traffic signal at Michael Blake Boulevard

WINTER SPRINGS, Fla.--On August 13, 2024, crews completed the installation of a new traffic signal at SR 434 and Michael Blake Boulevard in Winter Springs.

The project, approved by the City Commission in April of 2023, with preliminary construction beginning October 6, 2023, was funded with proceeds from impact fees.

City leaders say the new signal will enhance safety for pedestrians and vehicles along one of Winter Springs most heavily traveled roadways.

During the next two weeks, technicians will place equipment in "flash mode" to allow motorists to adjust to the new signal before it becomes fully operational. Travelers in the area are advised to exercise caution during this time.
